Forecast for Sunday 11 Jun 2023

Weather: Showery conditions at times overnight but many places staying dry, there is a risk of a heavier shower with hail and thunder but these should move through quite quickly. A mainly dry start to the day and any lingering showers in the west should move away with it brightening up for a time. Morning sunshine expected and feeling warm out on the hills despite the brisk winds. Afternoon showers, potential thunderstorms with hail, are expected, some localised flooding can be expected as water runs off the very dry ground. Many places will however remain dry. Showers tending to die out later in the evening.

Chance of cloud-free hill tops above 800m: 80% hill tops will generally be cloud free but cloud may thicken and lower in heavier showers.

Low Cloud and visibility: Patchy or scattered cloud may form above 600m near any showers. Very good visibility although it may turn hazy in the afternoon, visibility will become moderate or poor in any heavy showers.

Met Office Aberdeen Meteorologist's View

Feeling warm and humid on the hills despite the breeze. Strong gusts around any heavy showers that develop, Showers may turn to hail for a time and cause some localised flooding, with dry ground in places the water will run off very easily.

Forecast for Monday 12 Jun 2023

Weather: Mainly dry and clear overnight and a dry and bright start but showers soon developing and the risk of thunder and lightning too.

Maximum wind: Southeasterly 5-10mph

Chance of cloud-free hill tops above 800m: 90% cloud mainly above summits but lowering in showers.

Low Cloud and visibility: Patchy or scattered low cloud will form in showers above 600m shrouding summits for a time. Visibility likely to be mainly very good but turning poor in heavy showers with hail and thunder temporarily.

Temperature: **Glens:** Plus 13 rising to 24 C
At 800m: Plus 11 rising to 16 C
Freezing level: Above all summits
